KWIZERA EMMANUEL

Software Engineer (Kigali, Rwanda)

Experienced Software Engineer with 6+ years in web and mobile app development using Laravel, Spring Boot,NodeJS,React and flutter, Skilled in blockchain (Ethereum, ICP), delivering high- quality solutions, leading teams, and aligning projects with business goals.

WORK EXPERIENCE

Software Engineer -MINEDUC | Sep 2026 - Present

- Contributed to the full software development lifecycle, from gathering requirements and designing prototypes to deploying customized open-source solutions
- Developed clean, testable code while implementing system integrations, optimizing performance, and resolving complex defects,
- Maintained version control and release management, performed code reviews, and executed rigorous quality assurance testing.
- Ensured robust data integrity, managed secure code repositories, and handled continuous system upgrades and maintenance.
- Conducted research on new technologies for proof-of-concepts and provided comprehensive training for system users.

Software Engineer -Codible Group | Jan 2025 - Sep 2026

- Develop mobile ERP system
- Designed and developed back end APIs using Laravel, Spring Boot, NodeJS,
- Built modern front end interfaces using React, Next.js, and Flutter
- Optimize website performance, SEO, and responsiveness
- Worked with multiple languages including PHP, Java, and JavaScript
- Led full project lifecycle: planning, execution, deployment, and maintenance
- Collaborated with cross-functional teams and managed project deliverables
- Lead and develop ERP system development efforts, coordinating with cross functional teams for successful delivery.

SKILLS & TOOLS

- Back end Development (Laravel, Spring Boot,NodeJS)
- Front end React
- Mobile development (Flutter)
- HTML, CSS & JavaScript
- Java,PHP, Python
- USSD
- MySQL, Bootstrap
- System analysis
- Oracle DB, PostgreSQL,SQL server
- IIS
- Server management
- Agile methodology
- Docker
- AI Integration(OpenAI)
- Git version controller
- Firebase
- Digital Ocean,Vultr
- Windows Server/Linux
- Kafka,RabbitMQ
- Virtualization

EDUCATION

- University of Kigali
- Bachelor of Science in Information Technology 2019-2023.
- INES-Ruhengeri
- Master of Science in Software Engineering 2024- 2026

Sr Software Engineer|Techaffinity, Kigali,Rwanda | Jun 2021 - Dec-2024

- Developed robust back end APIs using Laravel, Spring Boot,NodeJS
- Programmed in P HP, Python, and Java, with Front end scripting using JavaScript and jQuery, Dart
- Built responsive Front end applications using React, Next.js, and Flutter
- Conducted debugging and performance tuning to ensure system reliability
- Lead development teams and initiated dai ly stand-up meetings to track progress and resolve blockers

Full stack | Nozaax, Kigali,Rwanda | Nov 2019 - jun 2021

- Developed backend APIs using Laravel, NodeJS, and Spring boot to support scalable application logic
- Built modern, user-friendly interfaces using React and Flutter
- Analyzed software requirements and designed system architecture using UML diagrams
- Designed and implemented relational database schemas using MySQL, PostgreSQL,ORACLE
- Collaborated closely with mobile app developers to ensure seamless system integration and performance

Back End | HviewTech, Kigali,Rwanda | Nov 2019 - jun 2021

- Create APIs using Laravel
- Performed software analysis and database design
- Collaborated with front-end developers to integrate Back end services
- Deploy

CONSULTANCY

- Contribute to the development of the curriculum at Rwanda TVET Trainer Institute (RTTI), shaping educational standards for tech professionals in Rwanda.
- Conducted a 15-day Flutter mobile application development training program in 2023, mentoring students on mobile app fundamentals, UI development, and hands-on project implementation. Supported learners through practical exercises and guided them toward building functional mobile applications.

PROJECTS

Goodbye old home

A platform for buying and selling investment properties.

Helps real estate investors connect, list, and close off-market deals

- ***Technologies used:*** *Laravel, mysql, Git version control,gitlab, postman*

Plant health assistant

- Develop mobile application to detect health
- integrate APIs and firebase
- Click **here** to find repo project
- **Technologies used:** Flutter, firebase, Postman,swagger documentation

ZentoraERP

- Involved in back end development and front end
- Integrate APIs and implement user interface using widgets
- **Technologies used**: Springboot, React, Flutter,, Postman, git version, CI/CD, Digital Oceon

Project- Leave management

- Involved in development of Develop back end and front end.
- Technologies used: Spring boot, React js, Git version, github, docker
- Get repo for this project, react here and java back end here
